KESIMPULAN CONCLUSION

Manajemen akan menimbang dengan hati-hati antara biaya untuk pengamanan yang baik dengan potensi biaya yang timbul dari :

1. Hilang produk atau peralatan
2. Hilang jam kerja karena perbaikan
3. Hilang waktu menunggu peralatan ganti
4. Hilang produksi karena pabrik mati
5. Hilang pendapatan karena sumur kering
6. Hilang nyawa karena mengabaikan keselamatan kerja
7. Ketegangan dengan masyarakat sekitar, potensial menimbulkan kerusuhan
8. Frustrasi, ceroboh, amatiran, potensial menyebabkan kerugian
9. Merusak reputasi keselamatan kerja

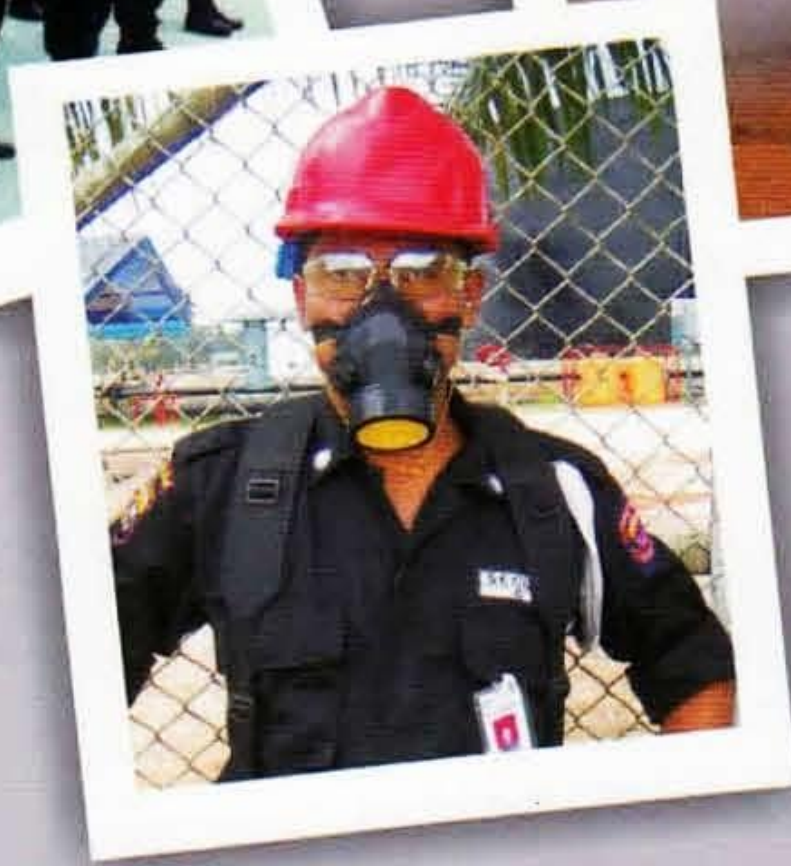

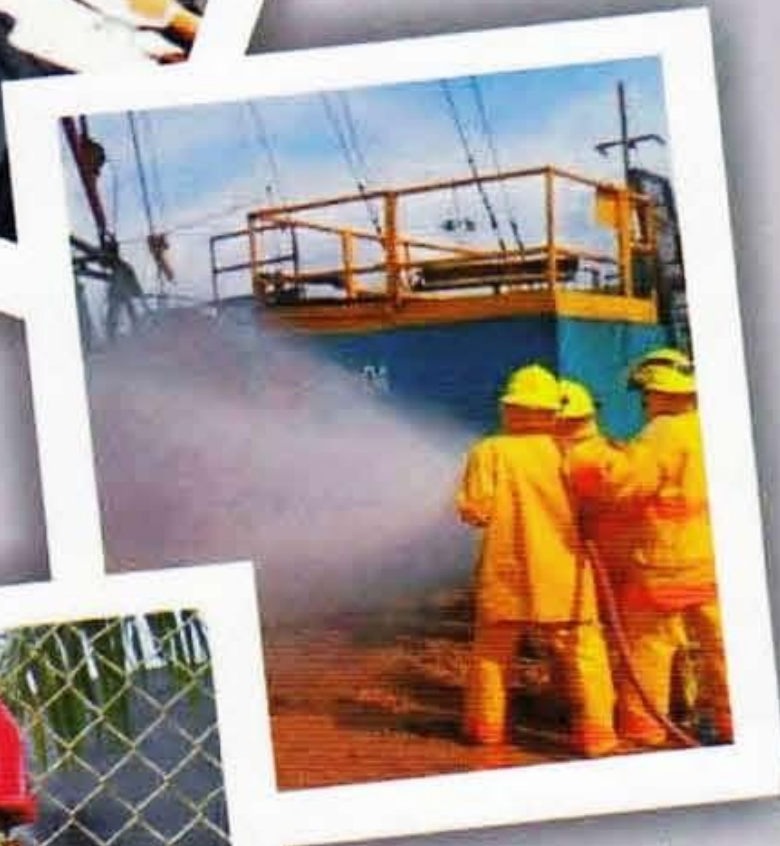

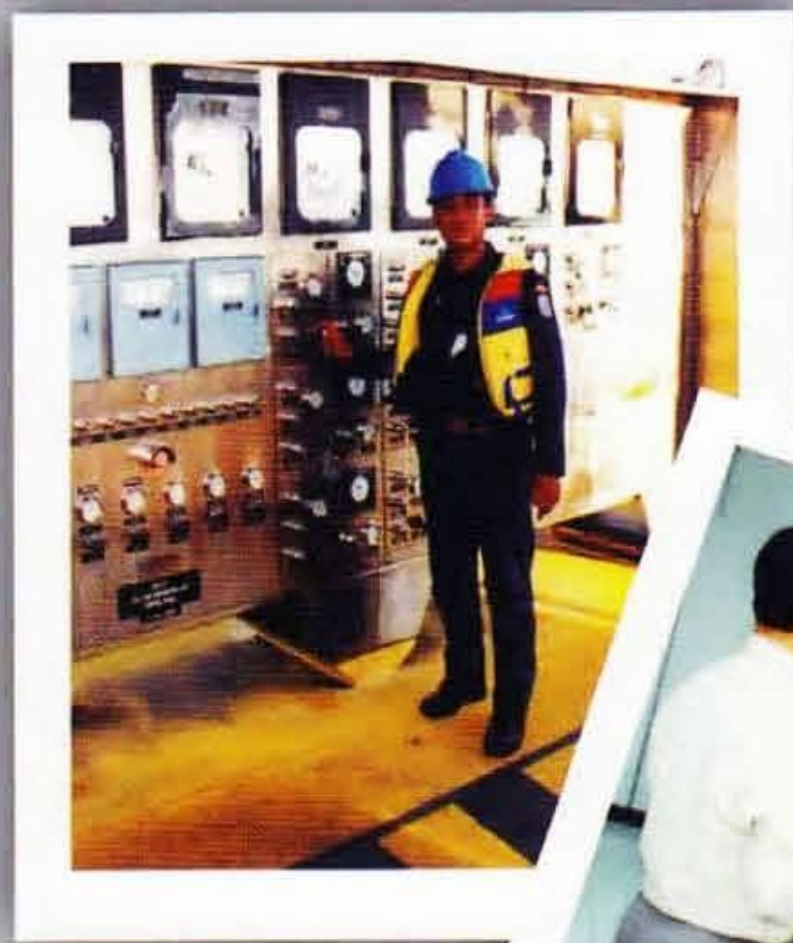

A potential client will carefully weigh the cost of good security measures against the cost of :

1. *Loss of products or equipment*
2. *Man-hours lost in recovery*
3. *Time lost in waiting for equipment*
4. *Lost production due to plant shutdown*
5. *Lost revenues due to well dying*
6. *Compromised safety, which could result in injury or loss of life*
7. *Strained relations with the locals, which could escalate into destructive confrontation*
8. *Frustration: where bungled, amateurish security could backfire, generating operational deficiencies.*
9. *Potential damage to an organization's safety reputation.*
